WATERWORDS.

Water Primary Good

After the historical claim "water master", today WATER means deep and advanced technological research for conscious and rational use of such a highly precious element.

DECLARING INDEPENDENCE

ZUCCHETTI DESIGN

Elena Zucchetti, an architect, heads the Zucchetti group with her brother, Carlo, continuing the traditional family business with enthusiasm and experience.

"Our story started in 1929 with my grandfather, Alfredo, who founded the company, which then went on to grow and develop thanks to the commitment and genius of my father, Mario, and my uncle, Luciano.

The mission and the values are immediately clear: Zucchetti is a design oriented company. Industrial design is an activity which does not derive from the creativity of one person, but can only be achieved through collaboration among a group of people who combine the different skills necessary for fulfillment of a project. Many minds have expressed themselves along the way with us and I am certain many others will do so in the future.

As far back as the early 1970s, my father already realized the need to work with celebrated designers, like Mario Oliveri of Studio Nizzoli or Achille Castiglioni. I was a young student of architecture at the time and I followed him enthusiastically to the offices of these "legends", remaining totally fascinated by the sensations I was experiencing, by their ability to read a project and to immerse themselves in the complications of industrial production.

It is possible, through design, to interpret society, expressing its pluralism and predicting its desires: Zucchetti is today internationally recognized as an historical brand of Italian design, tight fitting contemporary needs. In those years our cultural identity has been strengthened, drawing concepts and ideas from experiences in the world, which remains our main source of inspiration.

Wellbeing, intended in the holistic sense, is a primary value for us: our products therefore have specific functions, to be tried, which stir and involve all the senses. They are objects which enhance the beauty of the places in the home dedicated to personal care, where body and mind become one.

The bathroom is becoming an increasingly important part of the home and people's lifestyle, so we believe our work can contribute to improving the quality of life, allowing the enjoyment of new experiences and sensations through the products, within the comfort of one's own home."

*The mission and the values are immediately clear:
Zucchetti is a design oriented company.*

80 YEARS OF

ITALIAN DESIGN STORY

ZUCCHETTI

ZUCCHETTI.

ZUCCHETTI. KOS

The company is currently being run by the third generation who, strengthened by the tradition, has made it a major player in the taps and fittings sector and one of the industry's companies, which considers design as the universal language through which to express itself. Growth has been constant and achieved thanks to investments in design and total quality, with a firm belief in the strength of the brand and the high-range products, with a strong international focus which led to the creation of several business branches in the world. Alongside the main strategic choices, the success of Zucchetti is also due to its important collaboration with celebrated designers, which has led to the development of ideas and products which are always innovative. This trend started in the early 1970s and continued up to the most recent works with Matteo Thun and Antonio Rodriguez, Ludovica and Roberto Palomba, Barbara Sordina and William Sawaya, who designed the collections currently in the catalogue.

Zucchetti has always considered communication to be an extremely valuable support, as confirmed by the historical advertising campaigns, the constant presence on the pages of leading international magazines and the participation throughout the world in trade fairs, exhibitions and events. A communication culture that continues today, choosing every time the most effective medias and messages to tell the Zucchetti world. The Zucchetti universe can be summarized in the three words Water, Wellness and World. Zucchetti is contemporary, it is the ability to transform bathroom into a sculptural, sensual, international "place", where nature and design come together along different lines of thought.

Zucchetti Rubinetteria was founded in 1929 and more than eighty years of constant success have now gone by. The company started with the production of industrial valves, until Mario Zucchetti took over running the company in the 1940s and, together with his brother Luciano, converted production to chrome-plated bathroom taps and fittings, taking advantage of the particular moment of post-war reconstruction. Growth continued constantly and other companies joined the group, which now includes: Zucchetti Rubinetteria Spa, Zucchetti Mario Spa, Omez Spa and the Kos brand.

Italian culture, design, experience, know-how and quality in the interior designs of the entire world. Zucchetti, a leading manufacturer of products for the furnishing of bathrooms and wellness centres, spaces dedicated to relaxation, contemplation, day-dreams and desires, is also a leading supplier to projects for elegant hotels, large residential complexes, holiday cruisers and luxury yachts, designed by the best interior designers. Everyone has a chance to express his own style is briefly the philosophy behind Zucchetti's range. Zucchetti collections are the result of dialogue and cooperation with some of the best international designers, who give each time their interpretation of the combination Zucchetti-contemporaneousness. Zucchetti products are innovative in their technological content and in their forms, two elements that are not simply one at the service of each other; but which exist together in balance in Zucchetti taps. Each line affirms the company's wish to express itself and measure itself against many realities, so as to come into contact with different worlds and tastes.

SAVOY

DESIGN **MATTEO THUN AND ANTONIO RODRIGUEZ**

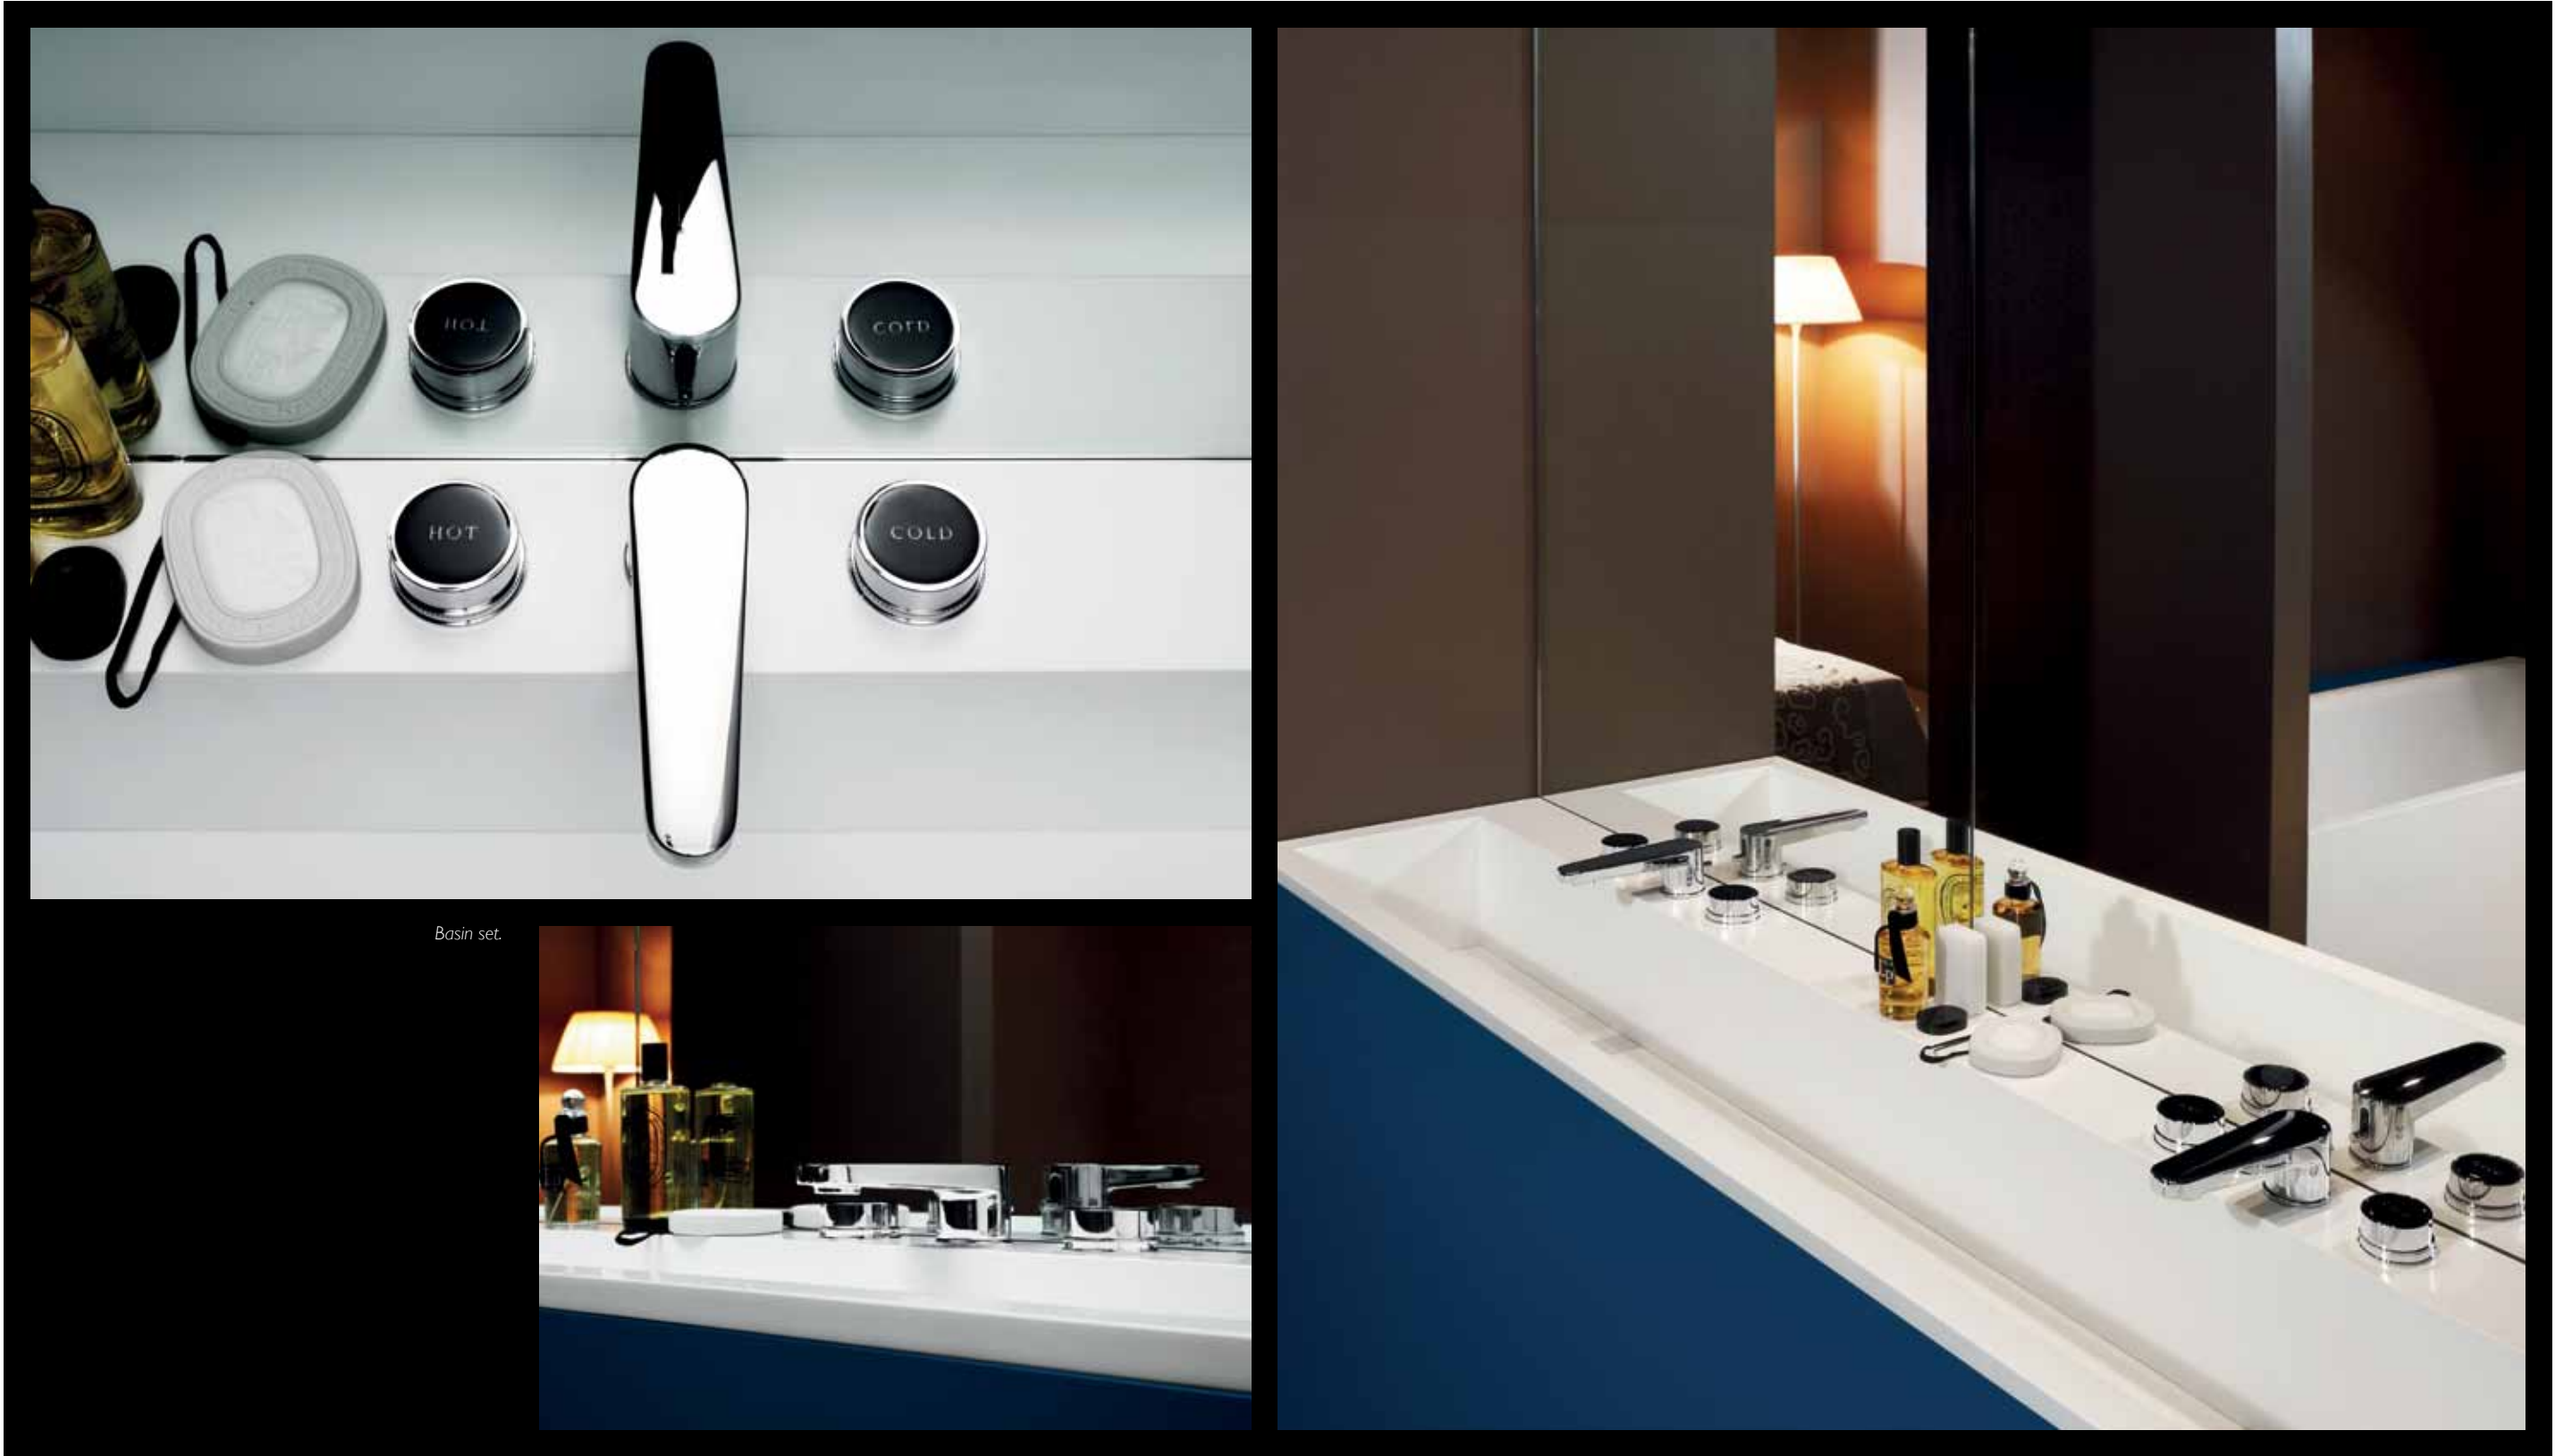

“We have come up with an extremely versatile product, a fusion of classic and contemporary.”

A collection that adapts perfectly to the style of a traditional hotel, modern-day elegant equilibrium. Another strong point of the collection is the exclusive customisation it offers: colours, finishes and logos can be combined for a wide range of variants. Unique and bespoke”.

“Classic versus contemporary” is the spirit of this new collection, devised primarily for the world of contract, hotels and refined design-rich architecture.

Matteo Thun and Antonio Rodriguez

DESIGN LUDOVICA + ROBERTO PALOMBA

travelling without moving...

"Nomadism, innovation and beauty are the passwords for this journey."

Single lever basin mixer.

Wall mounted basin mixer (above)

Bidet mixer (left)

Hob mount bath set.

“Faraway is the metaphor of a journey into real or virtual experiences: surpassing the ritual bathroom. It’s important to change the rules of the game every time. Our senses as protagonists, we are now exploring ‘beauty’, like nomadic globe-trotters in search of adventure.”

Ludovica + Roberto Palomba

BELLAGIO MON AMOUR

DESIGN **MATTEO THUN** WITH **ANTONIO RODRIGUEZ**

"It is not retro, it is not the revival of a style – it is Bellagio, maybe even a stylistic 'category maker'. Bellagio is a woman, despite its masculine name. And if we were to describe her, she would undoubtedly be a cosmopolitan woman, cultured, refined, eclectic, vain and, above all – beautiful!"

Matteo Thun

Basin set with high spout, lever handles.

Aguablu's spout has a rectangular section that lets water flow freely, recalling the cascade effect of a natural waterfall, reproduced with all its pleasant effects inside your home.

Basin set with single plate.

Built-in thermostatic mixer with 2 stop valves, lateral shower heads and shower head with wall mounted shower arm.

Slide rail set and wall tap set.

IT'S RAINING AGAIN

Soft forms, rounded corners, pure geometric lines and colour characterise these products of international design and great versatility.

The rain-shower heads are designed for maximum comfort and minimum water consumption: their dimensions are imposing, yet the water flow is always controlled.

Once again Zucchetti captures and interprets our demand for everyday well-being.
