ARCISAN

KITCHEN MIXERS

The **Arcisan** range of kitchen mixers has been designed to be aesthetically beautiful, whilst giving you the functionality you need for the kitchen. The designs represent the latest trends available globally and the broad range means there is a style to complement your modern kitchen decor.

They have also have been developed with a strong focus on reliability. By only sourcing world leading, technologically superior components, you can be assured your mixer will operate beautifully over a long trouble free life.

With their smooth, accurate operation and enviable reputation for reliability, European made Kerox ceramic disc cartridges are a must for this core component.

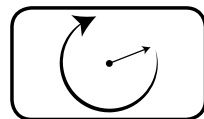

High quality, Italian made, Amfag hand sprays are used on selected mixers.

Cache® hidden aerators from Neoperl, the Swiss based market leader, guarantee effective water saving flow control and steam straightness.

For a finish second to none, each mixer is highly polished before being carefully plated with the robust ShineOn Chrome finish. The result is a stunning mirror like sheen that will continue to look great for many years to come.

Installation is easy, as each kitchen mixer has *Rapid Fixing Installation*. This means time saved and no special tube spanners required.

As testament to their durability and reliability, the mixers are confidently backed by a 15 year domestic warranty. Conditions apply.
