

Pan Thermostatic Mixer 2 Stop Taps

ZP8091+R99631.SB

Finish: Satin Black

The Pan thermostatic mixer is Zucchetti's interpretation of the basic cylinder type mixer tapware. Pan begins with classic archetypes and goes on to develop completely original aesthetics and new types of taps. Designers Roberto and Ludovica Palomba have concentrated their attention on the joint between the vertical and horizontal elements. As in nature there are no cuts and weldings, so that the spout and handle have a soft connection to the body, like the branch to the trunk of a tree.

The 3/4" thermostatic cartridge means precise and constant temperature control whilst ensuring you can efficiently run even the largest rain showers. Flow control is via the two quarter turn ceramic disc stop taps. Independent stop taps allows you to run two shower outlets independently or both together.
