gala

Established for over 50 years now, Gala has earned a reputation as a high quality European manufacturer of sanitaryware. Although established to service the Spanish and Western European market, Gala now exports to over 50 countries across 5 continents. Our modern manufacturing plant is located in Burgos in the north of Spain. It boasts some of the most advanced manufacturing techniques in the world, including some fully robotic production.

We at Gala are constantly innovating and developing products in line with the latest trends from Europe. By being close to you and listening to you, we have been able to bring you great new designs that you have requested for your bathroom spaces.

Gala is committed to manufacturing its products responsibly with the utmost care for the surrounding environment. Sustainability initiatives include updating equipment in favour of efficient new technology, reducing waste and using solar power.

Being of high quality, Gala sanitaryware is naturally backed by a generous 10 year warranty against manufacturing defects in the china.

Characteristics of Gala steel baths

Gala baths are produced in their technologically advanced European facilities to the highest standards. Gala baths meet the most stringent European standards and allow the baths to -

- > Have a high level of hardness which cannot be scratched by everyday bathroom items
- > Be highly resistant to chemicals such as acids and colourants
- > Be long lasting against the effects of light and time

This long lasting nature of Gala steel baths enables them to be backed by a 30 year guarantee.

Apart from the above, the baths are colour matched to our range of chinaware, which enables Gala to obtain homogeneity in hues.
