NOTE!!!

IMPORTANT – refer to the installation guide for correct install criteria.

The Neion floor mount water closet pan with integrated bidet seat complies with WMTS-051.

Bidet seat has integral break tank with air gap complying with AS 2845.2. Thus it meets the High-Hazard backflow prevention requirements of AS/NZS 3500.1 without the need for a RPZ valve.

The Neion intelligent toilet, by Arcisan, was created by combining the aesthetics of a rimless toilet pan with the cleaning function of a bidet.

It may be compact in size but is not short on features! With a soft-close wrap seat, it also hosts a 2-user memory, so you can easily program your specific requirements. The Neion is fully customisable with gender specific functions, massage function, drying functions, pressure increase / decrease, air temperature controls, water temperature controls, LED night light and deodoriser (using a diatomaceous mud filter).

These functions are accessible through the easy to use remote control. There is also a quick access option for the basic functions, by simply using the control knob on the side of the seat.

Your toilet has never been easier to clean. Boasting a rimless pan and a bowl that has been coated in a nano-glaze, called 'CleanTect', that gives the ceramic a smoother surface at a microscopic level; which helps alleviate areas for dirt and grim to build up. In addition, the nozzle is self-cleaning before and after every use plus the tank runs a self-cleaning mode if left in standby for an extended period of time.
