ARCISAN

The ARCISAN collection of tapware, showers and accessories have been engineered and designed in Australia to meet the needs of our discerning + creative clients. The complete range of products has been curated to meet design and functional needs and ensure a beautiful aesthetic is achieved. The most current technology in bathroom ware design is guaranteed with our collections, and with our incorporation of the most advanced finishes and air fusion technology incorporated with our unique shower options, we can assure your personal bathing routine will be a daily pleasure.

With over 30 years of bathroom product design experience, the ARCISAN brand represents a strong and secure connection to innovation | design | quality. Our products have continued to be recognised for exceptional quality, durability, and cutting-edge design.

All ARCISAN collections comply with Australian standards. Solid brass construction ensures a highly durable and resilient composition. All our products endure a rigorous quality control procedure before being released.

*Conditions apply.

All Arcisan progressive mixers are fitted with an incomparable progressive cartridge, selected from one of the world's leading European manufacturer.

The mixers have a smooth and even transition from cold to warm allowing the user to achieve the perfect temperature. Full handle rotation from cold to hot is a comfortable 90° with a manageable temperature zone in between.

This is a great advantage for the Arcisan progressive range as it completely avoids user difficulties that can arise with other cartridge brands.

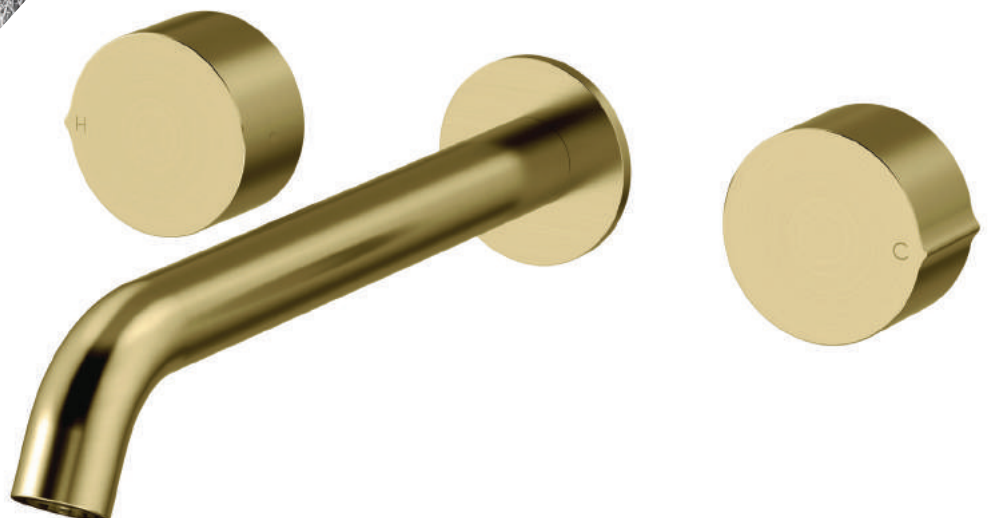

Venn

VENN has been designed to reflect soft lines and easy hold. The smooth surface is complimented with a slight yet detailed molded grip creating a unique and visually beautiful presence that will compliment your designed space.

VENN tapware is impeccably designed and will compliment interior elements, or paired with neutral finishes can create a unique standout effect.

With a range of design combinations from three-piece tapware to progressive mixers of both wall mount options and hob mount options, VENN can easily create a tailored and individual look. VENN is complemented by a full range of accessories.

Vierra

VIERRA is a refined contemporary design. The detailed face of VIERRA is a perfectly described tap. The vertical grip featuring precision knurling running from top to base, is designed with focus. This design note provides a comfortable grip and is complimented with the progressive cartridge housed within.

VIERRA has an extensive range of products available, from three-piece tapware sets to a diverse collection of progressive mixer pieces; these finishes are either electroplated or PVD (Physical Vapor Deposition) for a long-lasting look.

Trillion

TRILLION is beautifully detailed collection that reveals a sensory experience. With a striking design which features a soft bevel edge leading into delicate diamond detailed knurling dressing the sides of the handles. An elegantly balanced spout compliments the series. TRILLION creates a striking display with its design details, creating a visually unique integration between the bathroom, laundry and kitchen areas of your home.

Trillion is a glamorous classic, available in three-piece tapware only; to allow it to truly shine. It comes in a range of configurations and six on-trend colours and finishes. These finishes are either electroplated or PVD for a long-lasting look.

Synergii

The SYNERGII collection is a range that will come to the fore as the centerpiece of your bathroom and kitchen space. Curves soften its form and with its gentle handle design, it has a comfortable and elegant feel, with its design becoming an integral addition and focal point of your interior's design.

SYNERGII collection is available in selected PVD and electroplated finishes.

Axis Pin

The AXUS PIN series is our iconic and timeless design, a cylindrical form providing the basis in design for this mixer collection. It has a slim, round, balanced profile that will compliment any modern bathroom. AXUS PIN is an inimitable and comprehensive series, featuring hob mounted and wall mounted mixers, complimenting bath fillers, kitchen mixers and accessories.

AXUS PIN is available in a selection of electroplated or PVD (Physical Vapor Deposition) finishes.

Eneo

ENEEO seamlessly combines the square, geometric form with the comfort of curved corners. Presenting a clean, simple, yet balanced spout and handle, ENEEO has a contemporary look that showcases a design luxury.

ENEO is a comprehensive series, with hob and wall mounted mixers in multiple heights and spout lengths.

Finishes are either electroplated or PVD (Physical Vapor Deposition) for. Matching with the ARCISAN series of finishes, complete continuity with any bathroom, kitchen and laundry selections can be assured across the ranges.

The modern and timeless look of the Eneo accessories can work with other ranges of tapware due to the extensive range and choice of colours.

ARCISAN Showers

ARCISAN offers a complete range of shower, hand showers and outlet options for all bathrooms. From shower panels and twin showers to hand showers on rails and wall brackets as well as a large range of shower heads in various styles and sizes, there will be a solution for any bathroom and wellness space.

Synergii shower panel

The Synergii shower panel is a transformation in shower technology combining function and wellness. Created from aluminum alloy with durable stainless-steel hoses and brass bodies for body jets.

It features a 4-way shower function with the options of shower head, hand shower, waterfall outlet and three body sprays all controlled through a temperature regulator and four separate stop valves for each function.

Available in black or white and available with left- or right-hand side control; this versatile shower panel is a great addition to your bathroom. RETROFIT version available.

Synergii Twin shower columns

The Synergii shower column is a great solution for those wishing to match the flat handle designs of their tapware with a twin shower offering. It features a generous 250mm main shower head coupled with a 3 setting handshower mounted on a sliding holder.

Available in a broad range of colours and a top or bottom water inlet options.

Axis Twin shower columns

A thoroughly modern and timeless design that will ensure your bathroom never dates, is the hallmark of the Axis shower columns.

Coupled with high end components such as 25mm diameter brass tube, brass sliding piece and brass shower heads, reliability and a sense of luxury is ensured. The extra features of anti-twist hoses and 3 setting handshowers, with some models offering the latest air-fusion technology, makes it an unbeatable package.

With the broadest range of colours available in Australia and your choice of 3 shower head sizes, there is a solution to meet your needs.

The option of a top or bottom inlet gives you installation flexibility.

Rail showers

The Arcisan range of hand showers and rail sets are designed for an attractive luxurious shower experience whilst incorporating reliability.

The air-fusion hand showers feature the new push button technology for switching between normal, massage and combination spray patterns.

The brackets, slide rails and sliders are made from brass to ensure the longevity of these components in the harsh shower environment. The extra features of anti-twist hoses and 3 setting hand showers, with some models offering the latest air-fusion technology, makes a comprehensive offering.

A broad range of colours allows you to perfectly match with your choice of Arcisan tapware.
